Quality Policy Statement

Målmarks manufactures plastic products based on blow moulding technology. The organisation operates according to the needs of the market and following quality management system ISO 9001: 2008. Målmarks continuously analyses the ever-changing market conditions. Aiming to supply the market with high quality products, the organisation constantly invests in new machinery and adopts new technologies.

In order to perfect cooperate with customers, a stable and predictable quality must be achieved. All staff within Målmarks must abide by the principles of the Quality Policy Statement, which are as follows:

- A complete compliance with customer requirements must be reached.
- Smooth communication with customer plays an important role in the successful operation of the organization;
- The production and logistics processes by optimization and effectiveness aims to achieve maximum customer satisfaction.
- Målmarks formulates requirements to its the suppliers as part of our supply chain. We continuously evaluate our suppliers and expect production and its exact deadline specified delivery the best quality products.

In accordance with these principles, the implementation of these objectives relies heavily on experienced and qualified professionals. For this purpose, the organisation continuously invests on human resources and development, attaching special importance on the satisfaction of our employees.

The organisation continuously improves its operation through modern processes and methods that facilitate the planning of activities, assist in decision-making and ensure control of the process.

Målmarks is recognized in the market as being capable of evolving, learning and delivering. The company's permanent goal is to develop towards a more dedicated and effective enterprise companies.

Målmarks sees therefore the operation according to this Quality Policy as crucial to its own and its customers success.
